- **That Deerfield Has Shuttle Service to Miami?**

Sylvester Comprehensive Cancer Center offers our patients and caregivers complementary transportation services between Deerfield Beach Pap Corps Campus and Sylvester/UMHC (in Miami). This service is available Monday through Friday.

For additional information about schedules, or to arrange specific transportation needs, please call the Transportation Services scheduling department at **305-243-4342**.

- **That Deerfield has more than 100 clinical trials to offer patients?**

Clinical trials are clinical research studies that look at new ways to understand, prevent, detect, or treat a disease or condition. Treatments might be new drugs or combinations of drugs, new surgical procedures or devices, or novel ways to use existing treatments. The goal of a clinical trial is to determine if a new intervention, test, or treatment is effective and safe. There are also clinical trials to study other aspects of care, such as improving quality of life or controlling symptoms.

Our goal at Sylvester Comprehensive Cancer Center and the University of Miami is to translate research findings quickly into clinical care that benefits all patients.

At Deerfield we currently have 104 open trials in multiple disease categories. Talk with your provider regarding options that may be available to you.

- **That Deerfield, in addition to cancer care, offers all of your pre-operative testing?**

UPAC is one of the services offered at Deerfield for patients who are going to be having surgery. In UPAC, our team will carry out the orders that have been placed by your physician without you having to travel to Miami. The services provided include lab, EKG, Covid Testing, chest x-ray and any other service needed to clear you for surgery. During this visit you will also be given an overview of what to expect during surgery and any special orders your physician may have.

This service is offered to our patients from 8:00 AM – 2:30 PM and appointments are required. Once a request has been initiated, someone from our team will reach out to assist you with the scheduling process. Should you need an appointment one day before surgery, our team will work with your provider to ensure this takes place before 10:00 AM to ensure results are ready before your visit.

# Thank You
